# Pursuing a career in STEM

Advice, resources & our programmes

In today's job market, pursuing a career in STEM opens up a world of possibilities. Whether your students have already decided on a career in STEM or are still considering their options, we want to equip them with the tools to navigate their career journey.

1

### Get curious:

STEM fields are dynamic and constantly evolving. Embrace your curiosity, keep up with the latest developments and be open to lifelong learning.

2

### Build your resilience

Failure is often part of the learning process. Learn from setbacks and use challenges as opportunities for growth.

3

### Do your research

STEM courses and industries often require specific subjects or qualifications, so it's important to do your research when making career decisions.
